

An Overview of Power Query Editor

Power Query Editor

- Once you click on Transform on the Navigator window, the data will be displayed in Power Query Editor as shown below:

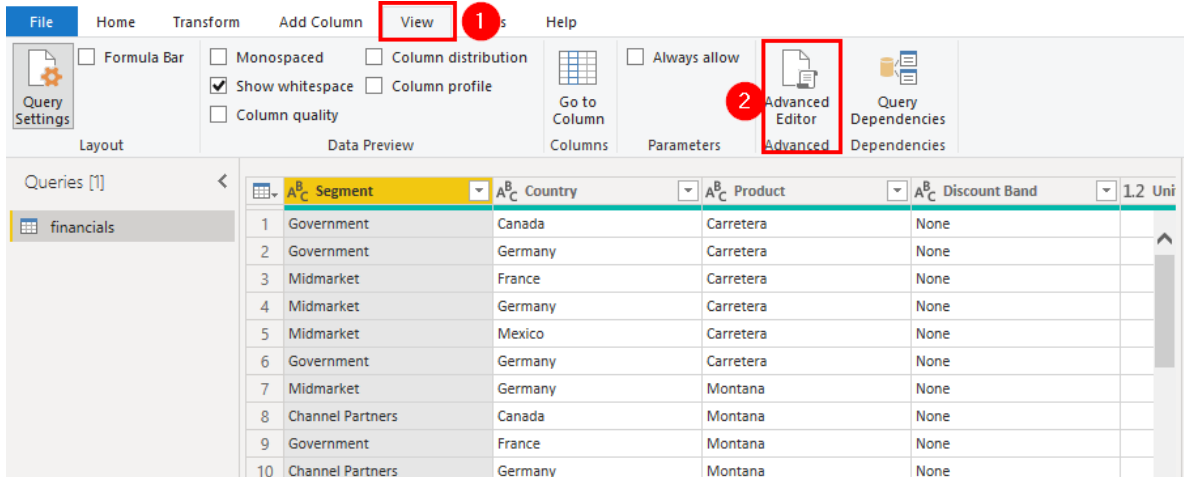

- Power Query Editor contains four main parts:
 - Ribbon** - which has all the transforming elements
 - Queries** pane - which display all the queries or tables in the file
 - Data View** - which displays the data
 - Query Settings** pane - which has the applied steps field, which shows you the steps you performed with your data

Advanced Editor

Advanced Editor shows the code for each step carried out by Power Query Editor

1. To launch Advanced Editor, go to **View** in the ribbon, and then, select **Advanced Editor**

The screenshot shows the Power BI ribbon with the 'View' tab selected. The 'Advanced Editor' button is highlighted with a red box and a red circle with the number '2'. The 'View' tab is also highlighted with a red box and a red circle with the number '1'. The 'Advanced Editor' button is located in the 'Parameters' group. The 'Query Settings' button is located in the 'Layout' group. The 'Query Dependencies' button is located in the 'Dependencies' group. The 'Advanced Editor' button is also labeled 'Advanced'.
