# Adding Bookmarks and Tooltips

Bookmarks

When creating bookmarks, the following elements are also saved with them:

- The current page
- Filters
- Slicers
- Visual selection state
- Sort order
- Drill location
- Visibility of an object
- The focus or spotlight mode of any visible object

1. To add a bookmark, click on the **Add** button from the **Bookmarks** pane

2. Once a bookmark is created, you can perform these on it:
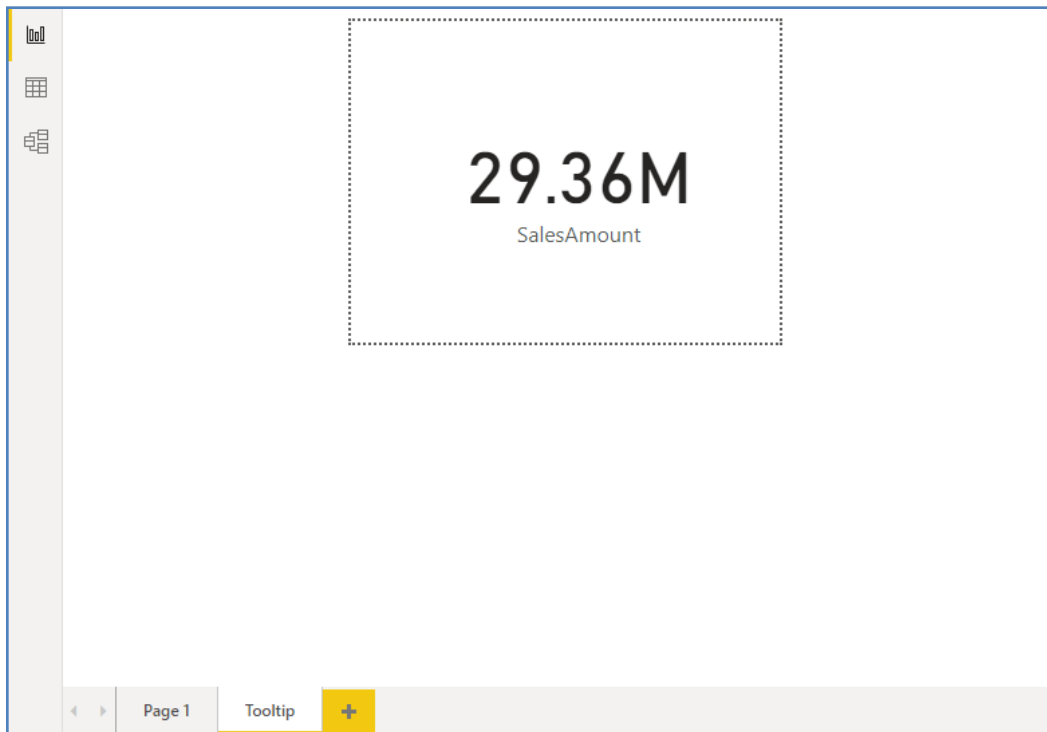

Tooltips

1. To create a new page, click on the plus symbol

2. Now, make the page a Tooltip page as directed in the below screenshot:

3. Then, in the page, you can create whatever visual you want to show as a tooltip for any visual

Setting up a Tooltip in a Page

1. Enable the tooltip from the format icon in the Tooltip page

2. Add the field in the tooltip in the values icon

3. Go to Page 1; click on the visual you want to add the tooltip to, and change the tooltip from Auto to the newly designed one
